1/ Includes producer milk and other source milk used to produce these products in regulated pool plants as well as diverted or transferred to non-order plants where these products are manufactured.

2/ Includes listed product groupings, nonfat solids used to fortify fluid milk products, and restricted data per 4/.

3/ Milk and dairy products that have been dumped, used for animal feed, or destroyed. Such uses were assigned to Class III which was the lowest priced class for this month.

4/ Data are restricted; pertains to the operation of fewer than three firms. Data are included in the “All Areas Combined” figure for the product grouping.

5/ Less than 500,000 pounds.
